Confirmation Letter Regarding the Regulatory Status of Mesoheal Pink Glow

To Whom It May Concern

We, Koru Pharma Co., Ltd., as the legal manufacturer of Mesoheal Pink Glow, hereby confirms the following

Mesoheal Pink Glow was initially developed in 2019 and has since been continuously marketed and distributed in more than 100 countries worldwide for approximately ten years.

To date, no significant adverse events (AEs) or serious adverse events (SAEs) associated with the product have been reported following its placement on the market.

From the initial stage of product design and development, Mesoheal Pink Glow was designed with an intended purpose involving intradermal administration.
Koru Pharma is currently planning and undertaking an internal regulatory assessment in preparation for transitioning the product's regulatory status to an EU MDR Class III implantable device.
Should you require any further information or clarification, please do not hesitate to contact us.

Sincerely,

619-88-00383
